Right

Test: Wrist Flexion

Parameter	Best	Average Force
Peak Force	L: 20.0 kgfR: 36.3 kgf 55.1 %	L: 15.6 kgfR: 24.6 kgf 63.4 %
Rate of Force Development	L: 0.0 kgf/sR: 5.0 kgf/s 0.0 %	L: 0.0 kgf/sR: 3.0 kgf/s 0.0 %

Test	Rep	Muscle Strength		LSI	Normative
		Left	Right		
Wrist Flexion	01	11.8	36.3	55.1	15.4-35.8
	02	15.0	21.3		15.4-35.8
	03	20.0	16.2		15.4-35.8

Inferences:

The reported results are for information and are subject to confirmation and interpretation by the referring doctor to co-relate clinically.

Muscle Strength below normative range indicate weakness secondary to pain, inhibition, disuse atrophy and lack of strength.

* N/A : Based on research, normative values of age group between 10-19 for shoulder abduction, . hip flexion and hip extension are unavailable.

* Normative Ranges based on Global Multi- Ethnic Population, please use at discretion.
